Please replace the paragraph commencing on page 11, line 26, with the following:

To play the game of FIG. 4, the player wagers on one or more pay lines ~~106a-h~~106a through 106h. For purposes of this description it shall be assumed that the player has depressed the maximum wager button 122 to wager 3 units on each pay line ~~106a-h~~106a through 106h. The processor is prompted to select nine symbols from the beginning of the serial, random inventory and displays the same in the rows and columns of the game matrix 102 as shown. Based upon the symbols selected and displayed the player has obtained certain winning outcomes as tabulated below (all 7s are Red 7s):
